Signature Page**

This plan has been approved and adopted by the Clermont County Board of Health:

Clermont County Board of Health

09/09/2015

# Quality Improvement Plan

## Clermont County Public Health

### Table of Contents

---

Clermont County Public Health (CCPH) is committed to the ongoing improvement of the quality of services provided. This Quality Improvement Plan serves as the foundation of this commitment.

#### Table of contents

This plan includes the following topics:

Topic	See Page
Purpose and Introduction	1
Definitions and Acronyms	3
Description of Quality in Agency	5
Quality Goals and Implementation	10
Training	11
Evaluation and Monitoring	12
Communication	13
References & Resources	14
List of Appendices	16
Appendix A: Quality Goals and Implementation	17
Appendix B: Commonly Used QI Tools	20
Appendix C: QI Project Recommendation Form	22
Appendix D: QI Workbook (Separate Document)	

---

## Purpose & Introduction

---

### Executive summary

CCPH is dedicated to a culture of Quality Improvement. This plan is a part of CCPH's mission of "Striving to Improve Clermont County by Preventing Disease, Promoting Health, and Protecting the Environment". The QI Plan is connected to the Clermont County Community Health Assessment, Clermont County Community Health Improvement Plan, CCPH Strategic Plan and the agency's Performance Management System. This plan outlines the status of quality improvement within the agency, roles and responsibilities of the Quality Improvement Committee, the quality improvement process used, quality goals and implementation, project selection, training, evaluation and monitoring, and communication. CCPH desires to reach a state where quality improvement is firmly rooted in the culture of the agency. The Clermont County Board of Health and CCPH Administration are dedicated to providing the resources necessary to fully implement this plan.

---

### Mission, vision & values

**Mission:** Striving to improve Clermont County by preventing disease, promoting health, and protecting the environment.

**Vision:** Healthy People, Healthy Communities, Healthy Clermont.

**Values:**

**Service** – We believe in providing accessible and comprehensive services of exceptional quality.

**Credibility** – We believe in high standards of performance and adhering to evidence-based practices.

**Integrity** – We believe in being honest, fair, and reliable in our intentions and actions.

**Responsibility** – We believe in being accountable for our decisions and actions and taking ownership of our duties.

**Equity** – We believe all people have equal value and opportunity regardless of race, ethnicity, gender, sexual orientation, religion, zip code, health, or any other consideration, and we treat everyone with the same level of compassion and respect.

---

### Ten essential services

Clermont County Public Health continuously strives to assure that the Ten Essential Services of Public Health are provided in our community:

1. Monitor health status to identify and solve community health problems.
  2. Diagnose and investigate health problems and health hazards in the community.
  3. Inform, educate, and empower people about health issues.
-

- 
4. Mobilize community partnerships and action to identify and solve health problems.
  5. Develop policies and plans that support individual and community health efforts.
  6. Enforce laws and regulations that protect health and ensure safety.
  7. Link people to needed personal health services and assure the provision of health care when otherwise unavailable.
  8. Assure competent public and personal health care workforce.
  9. Evaluate effectiveness, accessibility, and quality of personal and population-based health services.
  10. Research for new insights and innovative solutions to health problems.
-

## Definitions & Acronyms

---

**Introduction** A common vocabulary is used agency-wide when communicating about quality and quality improvement. Key terms and frequently used acronyms are listed alphabetically in this section.

**Definitions** **Continuous Quality Improvement (CQI):** A systematic, department-wide approach for achieving measurable improvements in the efficiency, effectiveness, performance, accountability, and outcomes of the processes or services provided; applies use of a formal process (PDSA, etc.) to “dissect” a problem, discover a root cause, implement a solution, measure success/failures, and/or sustain gains.

**Plan, Do, Study, Act (PDSA, also known as Plan-Do-Check-Act, PDCA):** An iterative, four-stage, problem-solving model for improving a process or carrying out change. PDCA stems from the scientific method (hypothesize, experiment, evaluate). A fundamental principle of PDCA is iteration. Once a hypothesis is supported or negated, executing the cycle again will extend what one has learned (Embracing Quality in Local Public Health: Michigan’s QI Guidebook, 2008)

**Quality Assurance (QA):** Guaranteeing that the quality of a product/service meets some predetermined standard.

**Quality Improvement (QI):** Raising the quality of a product/service to a higher standard.

**Quality Improvement Plan:** A plan that identifies specific areas of current operational performance for improvement within the agency. These plans can and should cross-reference one another, so a quality improvement initiative that is in the QI Plan may also be in the Strategic Plan (PHAB Acronyms and Glossary of Terms, 2009)

**Quality Culture:** QI is fully embedded into the way the agency does business, across all levels, departments, and programs. Leadership and staff are fully committed to quality, and results of QI efforts are communicated internally and externally. Even if leadership changes, the basics of QI are so ingrained in staff that they seek out the root cause of problems. They do not assume that an intervention will be effective, but rather they establish and quantify progress toward measurable objectives. (Roadmap to a Culture of Quality Improvement, NACCHO, 2012)

**Storyboard:** Graphic representation of QI team’s quality improvement journey. (Scamarcia-Tews, Heany, Jones, VanDerMoere & Madamala, 2012)

---

**Acronyms**

BOH – Board of Health  
CCPH – Clermont County Public Health  
CHA – Community Health Assessment  
CHIP – Community Health Improvement Plan  
CQI – Continuous Quality Improvement  
QI – Quality Improvement  
QIC – Quality Improvement Committee  
WFDP – Workforce Development Plan  
WIC – Women Infant and Children  
OSU – Ohio State University

---

**Description of Quality in Agency**

---

**Introduction** This section provides a description of quality efforts in Clermont County Public Health, including structure, staffing, culture, processes, and linkages of quality efforts to other agency documents.

---

**Description quality efforts** In 2011, Clermont County Public Health started down the path of Quality Improvement. While QI projects had previously been done in an effort to improve processes and systems, staff had no formal training or a defined process for conducting projects. CCPH received a grant from the Ohio Public Health Partnership in March 2011 to train key staff and identify and work through a QI project. This was the first formal QI project and focused on the lack of written Standard Operating Guidelines for the agency. Realizing the need for all staff to be trained in CQI, CCPH contracted with OSU Center for Public Health Practice to conduct onsite CQI training for all staff. In 2014, CCPH added the *OSU Center for Public Health Practice CQI for Public Health: The Fundamentals* training to the employee orientation requirements, ensuring all new employees are trained in CQI.

In 2009 CCPH staff started developing annual work plans in an effort to improve programs, divisions, and the agency as a whole. After 2011, staff was encouraged to take on larger group projects for work plans with several of those focusing on QI projects. Projects focused on WIC clinics, rabies processes between the Nursing Division and Environmental Health, and Employee Evaluations. However, much of the formal process and documentation that was used with the first project was not continued. CCPH is good with the first round of PDCA, but repeated follow up through the cycle is not always carried out.

The QI Committee has determined, in comparing CCPH’s current status of QI with the *Roadmap to a Culture of Quality Improvement*, (NACCHO, 2012), that the agency is in Phase 5 which is defined as:

---

---

**Phase 5: Formal QI Agency Wide**

Executives and senior leaders hold staff accountable to expectations related to performance management and QI. This commitment is demonstrated by the dedication of sufficient financial and human resources to training, infrastructure, and support for collecting, monitoring, reporting, and improving individual, team, and organizational performance. Most staff value QI as a strategy for improving their work. QI is incorporated into job descriptions, employee orientation, and the performance appraisal process. Formal QI teams are formed on a regular basis, and the results of these efforts are consistently disseminated. As a result, processes are becoming clearly defined, efficient, effective, and standardized across the organization. A formal process for implementing, monitoring, and evaluating the QI plan is in place. Performance measures are linked to strategic goals. All teams have performance management plans, including data collection, analysis, and reporting and a centralized system for storing and accessing that data exists. Problem solving and decision making are driven by data.

CCPH desires to reach Phase 6 which is defined as:

**Phase 6: QI Culture**

Executives and senior leaders fully embrace quality and ensure the sustainability of the culture by maintaining necessary resources. Leadership turnover has minimal negative impact on the organizational culture. Performance management and QI are fully embedded into the way business is done at the individual, team, and organization levels. The use of formal and informal QI tools and methods to solve problems and create improvements is second nature to employees. Performance data drives all decision making across the organization. The organization is regarded as quality-driven and innovative. Employees are granted autonomy to fulfill their QI responsibilities. Staff understands how they contribute to the organization’s overall mission, vision, and strategic plan.

CCPH is aware that this process will take time, dedicated staff and resources.

---

**Links to other agency plans**

The strategic priorities set forth in CCPH’s Strategic Plan in conjunction with the Community Health Improvement Plan and Community Health Assessment provide a framework and direction for the activities of the QI Plan, which is a component of the overall performance management system. QI projects may be driven from objectives and strategies within the Strategic Plan and the Community Health Improvement Plan. Data within the Community Health Assessment may also drive agency or community QI projects.

---

**Quality improvement**

**Quality Improvement Committee**

The CCPH Quality Improvement Committee will consist of the Health Commissioner,

---

**management, roles & responsibilities**

Assistant Health Commissioners (Environmental Health and Community Health Services), QI Coordinator, Special Projects Coordinator, two Division Directors or Supervisors, Epidemiologist, and four program/support staff members. All members are voting members. The QIC will meet at a minimum of twice annually and may meet more often as the group deems necessary to carry out the tasks of the QI Plan.

Annually the Health Commissioner will update the Board of Health on QI projects staff have completed and annually staff will present QI projects to all staff at the January all hands meeting/newsletter.

The Responsibilities of the QI Committee include:

- Champion QI efforts throughout the agency
- Develop and revise/update the QI Plan annually
- Make recommendations for QI Projects based on identified priority areas in the Strategic Plan, Community Health Improvement Plan, Community Health Assessment, or other internal processes or systems that could benefit from being addressed as a QI Project
- Monitor QI projects, act to solve problems, review recommendations from QI projects for feasibility and assist in implementing quality improvements
- Assure adequate resources are devoted to QI initiatives including diverse and objective staff on QI Projects
- Monitor timelines and assure QI Projects are completed on time, unless documentation of extenuating circumstances is provided
- Assure that successful project outcomes become incorporated into CPH Standard Operating Guidelines

Committee Member	Responsibility
Health Commissioner Appointment: Permanent	Provide direction and oversight for QI program Allocate resources for activities Report to Board annually Have staff report at In-Service Day Encourages incorporation of QI concepts into daily activities and work plans
Assistant Health Commissioners (Environmental Health and Community Health Services) Appointment:	Ensure projects/plans meet PHAB requirements Meet Division Director Requirements below for Administration Division

Permanent	
Division Directors/ Supervisors (2) Appointment (1) : 2 year term Appointment (1) : 3 year term	Identify appropriate staff for QI teams Oversee QI efforts within the division Assure QI-related performance and/or professional development goal for all division staff Encourage staff to incorporate QI efforts into daily work Facilitate QI teams as needed Provide administrative support to QIC on rotating basis
Epidemiologist Appointment: Permanent	Identify appropriate staff for QI teams Encourage staff to incorporate QI efforts into daily work Facilitate QI teams as needed Provide administrative support to QIC on rotating basis Provide input on overall evaluations measures Assist QI Teams with data collection/interpretation
Program/ Support Staff (4) Appointment (2) : 2 year term Appointment (2) : 3 year term	Identify appropriate staff for QI teams Encourage staff to incorporate QI efforts into daily work Facilitate QI teams as needed Provide administrative support to QIC on rotating basis
Special Project Coordinator Appointment: Permanent	Responsible for special projects that are assigned by the Health Commissioner and Assistant Health Commissioner. Supports the Accreditation Process and participates in activities to ensure and maintain accreditation status by monitoring activities, collecting documentation, and preparing reports

Members of the committee are selected on a volunteer basis. If more members volunteer than there are positions, then a lottery system will be used to determine the candidate. Terms for the Health Commissioner, Assistant Health Commissioner, Special Project Coordinator and Epidemiologist are permanent. Terms for the Director/Supervisor staff and the Program Support/Staff will serve either a two year or three year term. This is to ensure institutional knowledge is retained but to allow others to become involved over time. Members can be re-elected to a position if there are no other candidates interested in serving on the committee.

The committee strives for consensus on all decisions and agrees to abide by majority vote in absence of consensus. The QI Coordinator will convene the first meeting of the QIC. The QI Coordinator will be responsible for setting meeting dates/times and agendas and moving the QIC team forward. The QI Coordinator will also be

---

responsible for taking meeting minutes and posting the minutes to SharePoint.

All staff within Clermont County Public Health will: participate in QI projects as requested, nominate QI projects, participate in QI training, and incorporate QI concepts into daily work.

The progress of the QI Projects are presented to all staff at the all hands meeting using the performance management system.

Each QI Project Team will report out on their project using a prescribed story board method at the January all hands meeting/newsletter. .

**Quality improvement process**

---

CCPH uses the Plan, Do, Check, Act, also known as the Deming cycle, methodology for QI efforts. This process has been in place since the implementation of work plans. CCPH has several copies of the *Public Health Foundation Public Health Quality Improvement Encyclopedia* available for staff and team use in working through QI projects.

The four phases in the Plan-Do-Check-Act Cycle involve:

- **Plan:** Identifying and analyzing the problem.
- **Do:** Developing and testing a potential solution.
- **Check:** Measuring how effective the test solution was, and analyzing whether it could be improved in any way.
- **Act:** Implementing the improved solution fully.

These are shown in Figure 1 below.

There can be any number of iterations of the phases, as the solutions are refined, retested, re-refined and retested again.

**How to Use the Tool**

**Step 1: Plan**

First, identify your exact problem. Useful tools include Affinity Diagrams, Brainstorming, Cause and Effect Diagrams, Root Cause Analysis, and other data

---

---

collection tools that can help identify the root of the problem. Once this is done, it may be appropriate to map the process. The final part of planning involves gathering additional information to start sketching out solutions.

**Step 2: Do**

This phase involves several activities:

- Generate possible solutions.
- Select the best of these solutions.
- Implement a pilot project on a small scale basis.

The *Public Health Foundation Public Health Quality Improvement Encyclopedia* has several tools that can be used to assist in generating ideas as well as commonly used tools for QI which can be found in Appendix A.

"Do" means "Try" or "Test". It does not mean "Implement fully." Full implementation happens in the "Act" phase.

**Step 3: Check**

In this phase, measure how effective the pilot solution has been, and gather any information from it that could make it better.

Depending on the success of the pilot, the number of areas for improvement identified, and the scope of the whole initiative, the phases may be repeated multiple times, incorporating additional improvements.

**Step 4: Act**

This phase is full implementation. However, the PDCA Cycle doesn't necessarily stop there. Other areas of improvement may need to be identified in the same process and the PDCA cycle repeated.

---

## Quality Goals & Implementation

---

This section presents the overall goals and implementation plan for QI. The plan will be reviewed and objectives will be updated annually by the QIC. The Quality Goals and Implementation can be found in Appendix A.

## Projects

---

**Introduction** This section describes the process for QI project identification, selection, prioritization, and selection of team members. A brief description of the projects is included below. Additional information about current and past projects may be obtained from members of the QIC and past story boards will be stored in SharePoint.

**Project selection** Potential projects are selected by the QIC. Priority will be based on the number of projects received, alignment with the agency mission, vision, values and Strategic Plan objectives, feasibility of the project, complexity of the project, available resources for the project, availability of data for the project and the potential internal and external impact the project may have. Additional consideration will be taken in regards to one project coming from a program area (non-clinical), one coming from the administration area and one coming from the population based health promotion, protection or improvement efforts to address a community health issue to meet PHAB documentation requirements. Sources of potential projects include internal and external customer feedback, program evaluations, after-action reviews, performance as related to PHAB standards and measures, the Clermont County Community Health Assessment, the Clermont County Community Health Improvement Plan, the CCPH agency Strategic Plan, audit or compliance issues, or project recommendations from the Board of Health.

Any staff member may recommend a project to the QIC for consideration at any time on the QI Project Recommendation Form (Appendix C). Additionally, project recommendations may be made by the QIC. Recommendations for team members can be made on the QI Project Recommendation Form; however, the QIC will appoint members to the teams to ensure diverse perspectives, subject matter expertise, and that resources are available to ensure team success. Teams will consist of three to seven members and represent affected programs, divisions, disciplines, and clients as needed.

**Current projects** Current projects are listed under quality goals and implementation.

---

## Training

---

**Introduction** Clermont County Public Health has incorporated QI training goals and objectives within the agency Workforce Development Plan. The WFD Plan includes goals, objectives, training descriptions, target audience, competencies addressed, resources/sources of training, and training schedules.

**Training and support** CCPH received a grant from the Ohio Public Health Partnership in March 2011 to train key staff in CQI. Realizing the need for all staff to be trained in CQI, CCPH contracted with OSU Center for Public Health Practice to conduct onsite CQI training for all staff. In 2014, CCPH added the *OSU Center for Public Health Practice CQI for Public Health: The Fundamentals* training to the employee orientation requirements, ensuring all new employees are trained in CQI.

All QIC Members and QI Project Team Captains must also take *the OSU Center for Public Health Practice CQI for Public Health: Tool Time*, unless they have already taken more advanced QI training. Note: The OSU training is currently down for maintenance. In the interim, QIC members will complete the following has eLearning modules developed by the Population Health Improvement Partners:  
<https://improvepartners.org/toolbox/toolbox-details/qi-videos-tools/>

A review of QI concepts for all staff will occur annually during an employee in-service day.

---

## Evaluation and Monitoring

---

**Introduction** This section describes the evaluation and monitoring for the QI Plan and projects.

---

**QI plan** This QI Plan will be reviewed and evaluated by the QIC annually. . Evaluation will occur at a regularly scheduled meeting with discussion around:

- effectiveness of meetings,
- effectiveness of the QI Plan in overseeing quality projects and integration within the agency,
- clarity of the QI Plan and its associated documents,
- lessons learned,
- progress toward and/achievement of goals as outlined in the Goals, Objectives and Implementation section, and
- review of QI Team evaluations (see below).

Meeting minutes will document the evaluation process and note any agreed upon changes. Goals will be revised and corrective actions and revisions will be made after this annual review.

---

**QI teams** QI Teams will provide project progress reports to the QI Council at each meeting. All teams will develop and submit project storyboards at the conclusion of the project and present on the projects at the annual In-Service day. Within one meeting of a project's finalization, all team members will be surveyed to determine QI process learning, perceived contribution to the project, value of the project experience and ultimate outcome, lessons learned, and to seek suggestions for overall agency QI efforts.

---

## Communication

---

**Introduction** In order to support quality as a usual-way-of-business, quality-related news is communicated on a regular basis using a variety of methods to staff, Board of Health, and the general public. This section describes how quality and quality initiatives are shared.

---

**Quality sharing**

**All CCPH Employees**  
QI Projects will be presented at the January all hands meeting/newsletter. QI Teams will present their story boards and include lessons learned. Additionally, staff will be briefed about QI projects at quarterly All Hands Meetings. All QI Story Boards will be maintained on SharePoint.

**Board of Health**  
Board of Health members will also receive an annual update on quality initiatives.

**Public**  
Project descriptions and results will be included in the annual report to the public.

**Other**  
In addition to these regularly occurring communications, the QIC will seek avenues to share quality initiatives with other community partners and other state and national audiences as appropriate.

---

## List of Appendices

---

The following documents are included as appendices to this plan:

**Appendix A:** Quality Goals and Implementation

**Appendix B:** Commonly Used QI Tools

**Appendix C:** QI Project Recommendation Form

**Appendix D:** QI Workbook

---

## Appendix A: Quality Goals and Implementation

Goal	Measure	Timeframe	Person Responsible
Annually, support a minimum of 2 quality improvement projects.	Team documentation; storyboards	annually	QIC; respective team members
Assure all new employees receive basic QI training	Documentation of Training	annually	QIC
Annually, review and update the QI Plan	Plan revision documented	annually	QIC
By October 1, 2016, all position descriptions will include expectations for involvement in QI, including training and team participation.	Position descriptions with expectations; documentation of training and project participation	10/01/2016	Health Commissioner, Division Directors, Supervisors
Project #1: By January 31 <sup>st</sup> annually, an immunization clinic plan will be developed by all staff involved in immunization clinics and approved by the Health Commissioner for the year to include immunizations for school aged children, seasonal influenza, international travel, and regularly scheduled clinics.	Team documentation; story board	July 2015 – October 2016	Team Leaders: Julianne Nesbit, Health Commissioner; and Angela Lipps, Immunization Nurse. Team Members: Denise Franer, Preventive Nurse; Carol Kisner, Nursing Administrative Assistant; Linda Fultz, Immunization Clerk II; Lindsay Jones Immunization Clerk I
Project #2: Evaluate Communicable Disease Protocol and set Program Standards for Quality Assurance By October 1, 2016.	Team documentation; story board	July 2015 – October 2016	Team Leader: Julianne Nesbit, Health Commissioner. Team Members: Angela Lipps, Immunization Nurse; Jan Napier, Communicable Disease Nurse; Tim Kelly, Assistant Health Commissioner; Jackie Lindner, Director of Nursing; Denise Franer, Preventive Nurse
Project #3: Improve the Hiring/Recruiting Process by October 1, 2016.	Team documentation; story board	January 2016 – October 2016	Team Leader: Trina Stapleton, Fiscal Officer. Team Members: Amanda Myers, Operations Manager; Robert Wildey, Director of Water & Waste; Jackie Lindner, Director of Nursing; Liza Armstrong, Breastfeeding Peer; Jan Napier, Communicable Disease Nurse

Project #4: Improve New Employee Orientation by October 1, 2016.	Team documentation; story board	January 2016 – October 2016	Team Leader: Amanda Myers, Operations Manager. Team Members: Trina Stapleton, Fiscal Officer; Carol Kisner, Nursing Administrative Assistant; Kelly Shepherd, Plumbing Inspector; Christian Jent, WIC Clerk; Doug Disbennett, SIT Water & Waste; Katie Bissler, SIT Environmental Health; Stephanie Humphries, Dietician.
Project #5: Evaluate Inventory Management Requirements and Potential Software Solutions by October 1, 2016.	Team documentation; story board	January 2016 – October 2016	Team Leader: Maalini Vijayan, Emergency Response Coordinator. Team Members: Tim Kelly, Asst. Health Commissioner; Jackie Lindner, Director of Nursing; Betty Fitzpatrick, Clerk; Ashley Bonar, Clerk; Carol Kisner, Administrative Assistant.
Project #6: Evaluate and Improve the Call-In Inspection Process for Water and Waste and Plumbing by October 1, 2016.	Team documentation; story board	January 2016 – October 2016	Team Leader: Kevin Jester, Director of Plumbing. Team Members: Tom Racke, RS Water and Waste; Erica Watson, Clerk; Julia Richmond, Clerk; Kevin Kinzbach, Plumbing inspector
By October 12, 2016 present on Quality Improvement Projects at Staff In-Service Day.	Presentations conducted	October 10, 2016	Project Leaders
2017 Project #1: Evaluate and Improve the Public Health Complaint Process by October 1, 2017.	Team documentation; story board	January 2017 – October 2017	Team Leader: Sidney Spurlock, ERC. Team Members: Julianne Nesbit, Health Commissioner; Tim Kelly, Assistant Health Commissioner; Robert Wildey, Director of Water & Waste; Tyler Braasch, SIT; Julie Richmond, Clerk; Kelly Shepherd, Plumbing Inspector; Amanda Myers, Operations Manager; Doug Disbennett, RS; Maalini Vijayan, Director of Environmental Health
2017 Project #2: Evaluate and Improve Employee Retention by October 1, 2017.	Team documentation; story board	January 2017 – October 2017	Team Leader: Katrina Stapleton, Fiscal Officer. Team Members: Julianne Nesbit, Health Commissioner; Tim Kelly, Asst. Health Commissioner; Amanda Myers, Operations Manager; Keith

			Robinson, Communications Coordinator; Katie Bissler, RS; Jackie Lindner, Director of Nursing; Tara Wilson, Epidemiologist; Katherine Schneider, WIC Director; Becky Bilby WIC Dietitian.
2017 Project #3: Review return on investment of Nursing Services and develop decision making tool by October 1, 2017.	Team documentation; story board	January 2017 – October 2017	Team Leader: Angela Lipps, Nurse Supervisor. Team Members: Julianne Nesbit, Health Commissioner; Jackie Lindner, Director of Nursing; Carol Kisner, Administrative Assistant; Denise Franer, Preventive Nurse; Katrina Stapleton, Fiscal officer; Tara Wilson, Epidemiologist; Tim Kelly, Assistant Health Commissioner; Linda Fultz, Immunization Clerk.
2017 Project #4: Evaluate and Reduce Cost of FSO/RFE Plan Review by October 1, 2017.	Team documentation; story board	January 2017 – October 2017	Team Leader: Maalinii Vijayan, Director of Environmental Health. Team Members: Scott Bradley, RS; Dan Warren, RS; Katie Bissler, RS; Sidney Spurlock, RS; Mackenzie Dickman, RS.
B2017 Project #5: y October 9, 2017 present on Quality Improvement Projects at Staff In-Service Day.	Presentations conducted	October 9, 2017	Project Leaders
2018 Project #1: Between October 2018 and October 2019, EH division will provide PIC course participants with a more interactive course through integration of technology, improvement of materials, and streamlining administrative duties.	PowerPoint slides, SOGs and other documentation; story board	January 2018 – December 2018	Team Lead: Katie Bissler Team Members: Maalinii Vijayan, Scott Bradley, Dan Warren, Mackinzie Dickman and Bela Perler
2018 Project #2: Create reimbursement rate to cover percentage of staff time by creating a Refund Policy that would be effective January 1, 2019. We would also like to reduce the number of refunds issued by: Staff education Creating and/or updating	Refund regulation signed by the Board of Health	January 2018 – December 2018	Team Facilitator: Karen Crump Team Members: Linda Fultz, Paul Sanders, Kevin Jester, Maalinii Vijayan, Trina Stapleton

SOG's

Educating the public of the Refund Policy

<p>2019 Project #1: <b>Private water and septic abandonment.</b>  <b>AIM:</b> Reduce the number of septic and private water abandonments that are completed more than 30 days after Building Department demolition inspection or sewer/water cutover inspection.</p>	<p>Number of sewer/water cutovers or demolitions completed / # abandonment inspections greater than 30 days after final cutover/demolition.</p>	<p>January 2019 – December 2019</p>	<p>Facilitator: Doug Disbennett          Team Members: Jessica Hunt, Julie Richmond, Paul Sanders, Kelly Shepherd, Robert Wildey</p>
<p>2019 Project #2: <b>Marketing childhood immunization services</b></p>		<p>January 2019 – Ongoing</p>	
<p>2019 project #3: <b>Itineraries</b>  <b>AIM:</b> To improve the efficiency of the itinerary process by reducing the amount of data entry errors by limiting the program and activity code combinations by 1/1/20; reduce the amount of administrator time spent on reporting by 80% in 2020; and reduce the amount of late entries by 60% in 2020.</p>	<p>Success will be no late entries 70% of the pay periods and maintain an average of 96% of staff having time entered on time. Administrator time spent on Daily Activity Reports will decrease from an average of 11 hours per month (2012-2018) to 2 hours per month.</p>	<p>January 2019 – December 2019</p>	<p>Lead: Katrina Stapleton, Team member from each division: Jennifer Bauer, Bethany Bertsch, Katie Horner, JD Crowe, and Tom Racke.</p>
<p>2019 project #4: <b>Board of Health By Laws</b>  <b>AIM:</b> Reduce the amount of time in Board of Health (BOH) meetings spent on non-controversial topics to allow greater time to discuss emerging public health issues by January 1, 2020.</p>	<p>Maintain an average of eight consent agenda items per meeting which do not need specific discussion and individual approval. The data will be reviewed in March of 2021 during the Administration Meeting.</p>	<p>January 2019 – December 2019</p>	<p>Staff: Tim Kelly, Assistant Health Commissioner, Katrina Stapleton, Fiscal Officer, Bethany Bertsch, Administrative Assistant, Janet Rickabaugh, Board of Health President, Andrew Crum, Board of Health Vice President, and Dennis Brown, Dr. Joseph Khan, and Eric Heiser, Board of Health Members</p>
<p>2020 – 2021 Project #1: <b>Progressive Discipline QI</b></p>	<p>Have all new supervisors</p>	<p>January 2020 –</p>	<p>Lead: Julianne Nesbit, Team Members: Amanda Myers, Angela</p>

<p><b>AIM:</b> We aim to improve consistency and proper documentation in the progressive discipline process across the agency by December 31, 2021 to be fair and clear in communication to all staff. Specific goals are to increase director and supervisor knowledge of progressive discipline processes and proper documentation by documenting the majority of supervisors and directors strongly agreeing with knowledge based questions from pre to post surveys.</p>	<p>complete a post-assessment after reviewing the policies, the SOG, and the training video and indicate the “agree” or “strongly Agree” with the questions asked. Post-assessment results from October 2021 indicate 100% of current supervisors responded with “agree” or “strongly Agree” with the questions asked.</p>	<p>December 2021</p>	<p>Lipps, Bethany Bertsch, Carol Kisner, Tara Jimison, Katherine Schneider, Katrina Stapleton, Kelly Shepherd, Maalini Vijayan, Robert Wildey, and Tim Kelly</p>
<p><b>2020 – 2021 Project#2: Septic Rehab</b> We aim to reimburse Septic Rehab Contractors within 30 days of the system passing final inspection by utilizing MUNIS General Billing.</p>	<p>Success will be jobs being awarded within 45 days of initial solicitation and an average of less than 14 days between invoice submission or system final and payment being issued to the contractor.</p>	<p>January 2020 – December 2021</p>	<p>Lead: Katrina Stapleton, Team Members: Jason Fountain, Prosecutor’s Office; Gael Fawley, Community and Economic Development (CED), and Jennifer Hartley, Auditor’s Office</p>

## **Appendix B: Commonly Used QI Tools**

## Quality Improvement (QI) Toolbox

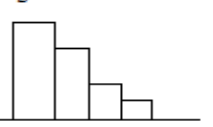

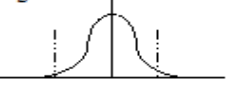

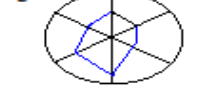

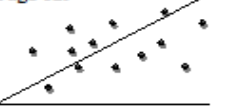

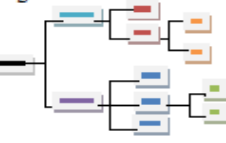

<i>QI Tool</i>	<i>What the Tool Does</i>	<i>Public Health Memory Jogger II</i>
Activity Network Diagram/ Gantt Chart	Used to: Schedule sequential and simultaneous tasks <ul style="list-style-type: none"> <li>Gives team members the chance to show what their piece of the plan requires and helps team members see why they are critical to the success of the project.</li> <li>Helps teams focus its attention and spare resources on critical tasks.</li> </ul>	Page 3 
Affinity Diagram	Used to: Gather and group ideas <ul style="list-style-type: none"> <li>Encourages team member creativity by breaking down communication barriers.</li> <li>Encourages ownership of results and helps overcome "team paralysis" due to an array of options and a lack of consensus.</li> </ul>	Page 12 
Brainstorming	Used to: Create bigger and better ideas <ul style="list-style-type: none"> <li>Encourages open thinking and gets all team members involved and enthusiastic.</li> <li>Allows team members to build on each other's creativity while staying focused on the task at hand.</li> </ul>	Page 19 
Cause and Effect/Fishbone Diagram	Used to: Find and cure causes, not symptoms <ul style="list-style-type: none"> <li>Enables a team to focus on the content of the problem, not the problem's history or differing personal issues of team members.</li> <li>Creates a snapshot of the collective knowledge and consensus of a team around a problem.</li> <li>Focuses the team on causes, not symptoms.</li> </ul>	Page 23 
Check Sheet	Used to: Count and accumulate data <ul style="list-style-type: none"> <li>Creates easy-to-understand data ~ makes patterns in the data become more obvious.</li> <li>Builds a clearer picture of "the facts", as opposed to opinions of each team member, through observation.</li> </ul>	Page 31 
Control Charts	Used to: Recognize sources of variation <ul style="list-style-type: none"> <li>Serves as a tool for detecting and monitoring process variation. Provides a common language for discussing process performance.</li> <li>Helps improve a process to perform with higher quality, lower cost, and higher effective capacity.</li> </ul>	Page 36 
Data Points	Used to: Turn data into information <ul style="list-style-type: none"> <li>Determines what type of data you have</li> <li>Determines what type of data is needed</li> </ul>	Page 52 
Flowchart	Used to: Illustrate a picture of the process <ul style="list-style-type: none"> <li>Allows the team to come to agreement on the steps of the process. Can serve as a training aid.</li> <li>Shows unexpected complexity and problem areas. Also shows where simplification and standardization may be possible.</li> <li>Helps the team compare and contrast the actual versus the ideal flow of a process to help identify improvement opportunities.</li> </ul>	Page 56 
Force Field Analysis	Used to: Identify positives and negatives of change <ul style="list-style-type: none"> <li>Presents the "positives" and "negatives" of a situation so they are easily compared.</li> <li>Forces people to think together about all aspects of making the desired change as a permanent one.</li> </ul>	Page 63 
Histogram	Used to: Identify process centering, spread, and shape <ul style="list-style-type: none"> <li>Displays large amounts of data by showing the frequency of occurrences.</li> <li>Provides useful information for predicting future performance.</li> <li>Helps indicate there has been a change in the process.</li> <li>Illustrates quickly the underlying distribution of the data.</li> </ul>	Page 66

A	3	4	4	11																							
B	2	1	2	5																							
C	4	3	3	10																							
D	1	2	1	4																							
<p><b>Pareto Chart</b></p>	<p>Used to: Focus on key problems</p> <ul style="list-style-type: none"> <li>Helps teams focus on those causes that will have the greatest impact if solved. (Based on the Pareto principle ~ 20 % of the sources cause 80% of any problem.)</li> <li>Progress is measured in a highly visible format that provides incentive to push on for more improvement.</li> </ul>	<p>Page 95</p> 																									
<p><b>Prioritization Matrices</b></p>	<p>Used to: Weigh your options</p> <ul style="list-style-type: none"> <li>Forces a team to focus on the best thing(s) to do and not everything they could do.</li> <li>Increases the chance of follow-through because consensus is sought at each step in the process (from criteria to conclusions)</li> </ul>	<p>Page 105</p> <table border="1" data-bbox="1068 999 1295 1073"> <thead> <tr> <th>Cost</th> <th>A</th> <th>B</th> <th>C</th> <th>Total</th> </tr> </thead> <tbody> <tr> <th>A</th> <td>3</td> <td>1/3</td> <td>1/10</td> <td>0.3</td> </tr> <tr> <th>B</th> <td>3</td> <td>1</td> <td>1</td> <td>6</td> </tr> <tr> <th>C</th> <td>10</td> <td>1</td> <td>1</td> <td>11</td> </tr> </tbody> </table>	Cost	A	B	C	Total	A	3	1/3	1/10	0.3	B	3	1	1	6	C	10	1	1	11					
Cost	A	B	C	Total																							
A	3	1/3	1/10	0.3																							
B	3	1	1	6																							
C	10	1	1	11																							
<p><b>Process Capability</b></p>	<p>Used to: Measure conformance to customer requirements</p> <ul style="list-style-type: none"> <li>Helps a team answer the question "Is the process capable?"</li> <li>Helps to determine if there has been a change in the process.</li> </ul>	<p>Page 116</p> 																									
<p><b>Radar Chart</b></p>	<p>Used to: Rate organization performance</p> <ul style="list-style-type: none"> <li>Makes concentrations of strengths and weaknesses visible.</li> <li>Clearly defines full performance in each category.</li> <li>Captures the different perceptions of all the team members about organization performance.</li> </ul>	<p>Page 121</p> 																									
<p><b>Run Chart</b></p>	<p>Used to: Track trends</p> <ul style="list-style-type: none"> <li>Monitors the performance of one or more processes over time to detect trends, shifts, or cycles.</li> <li>Allows a team to compare a performance measure before and after implementation of a solution to measure its impact.</li> </ul>	<p>Page 125</p> 																									
<p><b>Scatter Diagram</b></p>	<p>Used to: Measure relationships between variables</p> <ul style="list-style-type: none"> <li>Supplies the data to confirm a hypothesis that two variables are related.</li> <li>Provides a follow-up to a Cause &amp; Effect Diagram to find out if there is more than just a consensus connection between causes and the effect.</li> </ul>	<p>Page 129</p> 																									
<p><b>Tree Diagram</b></p>	<p>Used to: Map the tasks for implementation</p> <ul style="list-style-type: none"> <li>Allows all participants (and reviewers outside the team) to check all of the logical links and completeness at every level of plan detail.</li> <li>Reveals the real level of complexity involved in the achievement of any goal, making potentially overwhelming projects manageable, as well as uncovering unknown complexity.</li> </ul>	<p>Page 140</p>

## Appendix C: QI Project Recommendation Form

<b>Proposed QI Project Recommendation:</b>												
<b>Person Suggesting Project:</b>												
<b>Does the Project comply with CCPH Mission:</b>	<input type="checkbox"/> Yes <input type="checkbox"/> No Striving to improve Clermont County by preventing disease, promoting health, and protecting the environment.											
<b>Do you already have the solution to the problem?</b>	<input type="checkbox"/> Yes <input type="checkbox"/> No If Yes, briefly describe _____ _____											
<b>Who is impacted by the problem/solution?</b>												
<b>What data are available to measure QI changes?</b>												
<b>Suggested Team Leader:</b>												
<b>Suggested Team members:</b>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left; padding: 2px;">name</th> </tr> </thead> <tbody> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> <tr><td style="height: 20px;"> </td></tr> </tbody> </table>	name										
name												
<b>Lines below are for QIC Team Review:</b>	All categories will be given a 1-5 numbered ranking with 5 being the Most or Highest and 1 being the Least or Lowest. Scores are only used as a guideline in selecting projects; project selection is at the discretion of the QIC.											
Alignment with the mission and vision	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5											
Alignment with Strategic Plan	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5											
Feasibility	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5											
Complexity	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5											
Resources	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5											
Internal impact	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5											
External impact	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5											
<b>Total:</b>												

## **Appendix D: QI Guide**

**The QI Guide is a Separate Document that can be found in SharePoint**

### Appendix E: QIC Activity Timeline

<b>Activity</b>	<b>Timeline/Frequency</b>	<b>Person Responsible</b>
QI Committee meetings	Last Tuesday of March, June, September and November	QI Coordinator
