Dish Machine Sanitizer Log

Instruction:

1. Prior to each shift record temperature and sanitizer concentration, as appropriate and applicable.
2. Test strips shall be used to check for proper sanitizer concentrations.
3. For high temp dish machine, an irreversible registering temperature indicator shall be used for measuring the utensil surface temperature
4. If sanitizer does not meet the required temperature/concentration, and pressure contact person-in-charge and take corrective actions immediately.

Date and Time	Wash Temperature	Rinse Temperature	Final Rinse Temperature (Note: 165°F or 180°F)	Utensil Surface Temperature (Minimum 160°F)	Sanitizer Concentration (Minimum 50ppm Chlorine)	Corrective action if needed	Verified By
